PURELINE/PURELINE NR LINEAR LED STRIP

DESCRIPTION

PURELINE NR is a linear LED strip luminaire with rigid PCB integrated into aluminium profile. It is mostly been used for surface mounted lighting applications. PURELINE NR has an opal PMMA light diffuser which allows well homogeneous light and high lumen output ratio with low glare. It is also very easy to make continuous linear lighting application with PURELINE series with its uninterrupted power feeding cables and mounting brackets. The system PCBs can be cutted every 100mm.

PURELINE series are able to be controlled via DALI/0-10V/1-10V protocols and wirelessly control as optional.

PURELINE series can widely be used in projects such as art galleries, hotels, retail stores, educational facilities, hospitals... etc.
